ABOUT

I am an aspiring UI/UX designer who is deeply passionate about human-centered design. I enjoy finding simple solutions to frustrating problems. Currently, I am focusing my efforts on UX research to learn how to turn complex user workflows into clean, friendly, and practical digital experiences.

Earliest Start Date: 24 Aug 2026

EDUCATION

Bachelor of Science in Design & Artificial Intelligence

2024 – 2028

Singapore University of Technology & Design

- GPA: 4.4/5.0
- Recipient of the Shopee – SUTD Scholarship

PROJECTS

Dosewise

May 2026 – Present

60.005 Human Computer Interaction (HCI) and AI

- Formulated the UI/UX architecture and interactive layouts for an AI-powered prescription assistant designed to bridge health literacy gaps.
- Engineered an ambient, low-friction dashboard integrating temporal schedule dividers, real-time drug interaction warnings, and reactive inventory tracking counters.

Inclusive Digital Correspondence Service Redesign — CPF

May 2026 – Present

60.004 Service Design Studio

- Designed and developed the UI/UX and frontend for an internal Customer Correspondence Unit (CCU) dashboard to streamline digital chat support for vulnerable citizens.
- Developed intuitive user interfaces displaying real-time citizen sentiment scores, automatic query translation, and simplified account breakdowns to enable zero-friction human-AI hybrid support workflows.

Tuckr — Lionsbot

Jan 2026 – Apr 2026

60.003 Product Design Studio

- Conducted user research on hotel management and housekeeping staff to map out their workflows, identify pain points, and define exact quantitative success metrics.
- Designed high-fidelity 3D models and animated a promotional trailer in Blender to communicate the design vision.
- Built and evaluated a working hardware prototype with functional electronics to refine real-world hospitality staff interactions.

EXTRA-CURRICULAR ACTIVITIES

SUTD Productions - Quartermaster

Feb 2025 – Feb 2026

- Filmed, edited, and produced video coverage for multiple university events, ensuring high standards of visual storytelling and brand consistency.
- Managed logistical deployment for the crew's production gear to support our creative operations

SOAR UnderWater Unit - Hardware Lead

Mar 2025 – Aug 2025

- Modeled custom ergonomic add-ons to improve the navigational and structural performance of an underwater bot.
- Iteratively prototyped the robot's housing to improve its overall structural integrity and water resistance.

TECHNICAL SKILLS

Graphic Design: Figma, Adobe Illustrator, Adobe Photoshop

3D Modelling: Autodesk Fusion 360, Blender

Languages: Python, HTML, CSS, Javascript
